Ms. Swallow provides strategic expertise to life sciences companies and policymakers. She specializes in applying quantitative methods to real-world problems involving evaluation, decision making, strategy, and public policy in the health care and social policy sectors. She has more than 15 years of experience leading data analytics implementation, real-world evidence (RWE) generation, regulatory submissions, analytic platform design, and trial design. Ms. Swallow's expertise includes regulatory-grade indirect treatment comparisons, survey research, database analyses, natural history studies, brand strategy, policy evaluation, RWE development, individualized medicine, and predictive analytics. Additionally, she has led health and social policy program evaluations. Ms. Swallow has worked across disease areas, including obesity, rare diseases, immunology, multiple sclerosis, hematology, oncology, and renal disease. Her work has been used to inform regulatory and reimbursement decisions in US and global markets, published in numerous peer-reviewed journals, and presented at dozens of clinical and economic research conferences.
