Dr. Mu specializes in the application of advanced epidemiologic methodologies and biostatistical techniques to address a wide array of analytical questions in health care involving evaluation, decision making, and strategy. She has broad experience designing and implementing advanced and innovative data analytics and solutions for life sciences companies. Dr. Mu's expertise includes real-world evidence development, database analyses, chart review studies, survey research, predictive analytics, systematic and targeted literature reviews, indirect comparisons, and health economic modeling. She has broad experience developing strategies and conducting research to assess the clinical, economic, and humanistic impacts of diseases and treatments in a range of therapeutic areas, including nephrology, immunology, psychiatry, oncology, dermatology, gynecology, and virology. She has consulted to numerous life sciences companies on both novel pipeline agents and products on the market. Dr. Mu's work has supported health care payers and clinical decision makers in both US and global markets. Her research has been published in peer-reviewed journals and presented at clinical and economic research conferences.
